

Ellipsiz FY07 revenue up 8% to \$201 million

Core earnings excluding exceptional items up 12% to \$14 million

-----**MEDIA RELEASE FOR IMMEDIATE CIRCULATION**-----

(SINGAPORE, August 23, 2007) – SGX mainboard-listed Ellipsiz Ltd (“Group”), a leading probe card company and semiconductor services provider, today reported its financial results for the fiscal year ended June 2007.

Revenue was up 8% year-on-year (yoy) to \$201 million. Net profit after tax (PAT) declined 42% yoy to \$15 million. Excluding exceptional items, the Group’s PAT was up 12% to \$14 million, compared to \$13 million in FY06.

Probe card revenue grew 26% yoy to \$104m. The growth was mainly driven by higher output from added capacity. Silicon reclaim revenue grew 20% yoy to \$20 million on increased production output. Distribution and Services revenue declined 12% yoy to \$77 million, due primarily to non-recurrence of revenue from major facilities and services completed in FY06.

Xavier Chong, Chairman and CEO of Ellipsiz, said: “The first six months in the calendar year 2007 was very challenging for us as the semiconductor market braced demand slowdown, pricing pressures and inventory correction issues. We remain vigilant and cautious as near term outlook remains mixed. Barring any unforeseen circumstances, we are confident that our business strategies will enable Ellipsiz to continue enhancing shareholder value and growth over the coming years.”

Total dividend for FY07 was 0.6 cents, which was paid in March 2007.
